Software Engineer with experience in building web and mobile applications with Javascript, React, React Native, Svelte. My experience of 7 years has equipped me to thrive in fast-paced environments and to collaborate effectively with cross-functional teams to deliver applications as per requirements provided.

WORK EXPERIENCE

November 2024 - May 2025

Frontend Engineer, Fanomix LLC, UK (Remote)

At Fanomix LLC, I was a frontend engineer in a startup team building a web tool that helps brands and creators generate short-form UGC-style content.

Technologies: Svelte, Typescript, Tailwind, ShadCN

Sept 2022 - December 2023

React/React Native Engineer, Elsa Science, Sweden (Remote)

Elsa Science is a platform whose mission is to support individuals diagnosed with chronic disease to live life to its fullest by leveraging technology through providing meaningful content in the healthcare domain. At Elsa I was notably responsible for;

- Developing new features on the mobile and web apps notably medicine catalog, scheduler, clinical dashboard support system for medical personnel.
- Troubleshooting and resolving issues reported by customers.
- Monitoring, categorizing, and initially assessing the severity of incoming software bugs, security alerts, and log errors.
- Exposure to developing mobile applications in regulated environments (e.g HIPAA, GDPR).
- Optimization of the front end to improve user experience.
- Deployment of the apps to the app stores for the market.

Technologies: React, React Native, Typescript, Git, AWS, Apollo, GraphQL, Notion

March 2018 - May 2022

React Native Engineer, Addressya, Sweden (Remote)

Addressya's core solution is aimed at providing access to opportunities, inclusion, partnerships, and trade through improved addressing for the unaddressed. At Addressya I was responsible for;

- Architecting solutions for features to be implemented.
- Implement design specifications and stakeholder requirements.
- Propose functional and design improvements; infrastructure, development and release process of

the app to playstore.

- Refactoring the code-base to ensure scalability, reusability of code(React, React Native), and improvement of security
- Test driven development with Detox
- Onboarding of new colleagues onto the team

Technologies: React Native, Firebase, Jira, App Center

Feb 2015 - Feb 2018

Vinaj websites, Uganda

- Built a briefcase app for filling in documents and tracking the 8 stages involved in coffee shipments from Uganda with Django/Python.
- Built a mobile app for purchasing and delivering groceries around Kampala in Native Android/Java.
- Integrated a digital payments management solution for a waste management company.
- Setup an electronic e-shop and inventory management system with Shopify.

SKILLS

FRONTEND: Javascript, Typescript, React, React Native, Svelte, Tailwind

QA/Testing: Jest/Detox

Others: Java, Figma, Git, Github, Notion, Jira, AWS, Kubernetes, Docker, Maven, Xcode, Gradle

EDUCATION

B.Sc in Software Engineering

Makerere University, Kampala, Uganda
